About MedPharmPlast Europe

MedPharmPlast Europe is a sector group of EuPC created in 2014 by and for companies involved in the whole supply chain of plastic medical devices and pharmaceutical packaging in Europe.

MedPharmPlast Europe assists companies in these industry sectors by keeping them informed about the latest developments in European regulations and their impact on the medical device and pharmaceutical packaging plastics value chain.

As an expert group with other trade bodies, MedPharmPlast Europe furthermore represents the interests of the industry to the European legislators and tries to arrive at regulations that are both workable and protect the patient.

MPPE Mission

- Consider the patient outcome and experience as our priority
- Work with the European legislators to help maintain a dynamic and innovative industry
- Share key information amongst its membership
- Represent the platform where companies involved in plastics for medical devices and pharmaceutical packaging can meet, discuss and share information at European level
- Coordinate industry actions at European level utilising the knowledge and experience of the MedPharmPlast Europe members with plastics medical devices and pharmaceutical packaging

MPPE Activities

- MPPE Regulatory Task Force: technical, regulatory & monitoring activities for the association members
- Organisation of two MPPE events per year:
 - MPPE General Assembly - for members & invited guest
 - MedPharmPlast Europe Conference - open to members & external companies
- Monitor the status of substances commonly used in medical devices and pharmaceutical packaging within REACH, CLP, Biocides and RoHS legislation
- Participate in the European Medical Devices Expert Group, soon to be Medical Devices Coordination Group
- Liaise with other associations and stakeholders important for our industry
- Providing regular information & updates on important topics concerning the industry to our members
- Cooperation & exchange within EuPC (European Plastics Converters Association)
